

WE'VE GOT THE CURE FOR YOUR HOSPITAL HVAC NEEDS

It ain't easy making
hospital HVAC construction
and maintenance look easy.

Whether it's a new build out or modifications to an existing system in a fully occupied hospital, easy follows us to every job. And it all starts with our patented mix of smart solutions, industry-leading expertise and zero b.s.

More than a Breath of Fresh Air: Indoor Air Quality (IAQ) does more than help you breathe easy—it can benefit patient recovery and prevent the spread of infectious diseases.

Interested in Saving Money? We know a little something about maximizing your energy efficiency, and lucky for you, that translates to lower healthcare costs.

Count on Us and Your System: Met with the hygienic demands of a hospital, system reliability is pretty much our number one priority.

HEATING AND COOLING WITH ZERO B.S.

BECAUSE WE KNOW HOSPITALS CAN'T TAKE SICK DAYS

Every patient room, operating room, administrative office and service area has its own distinct needs. After over 10 years in mechanical contracting, our service technicians have got the hang of providing the specific construction and maintenance work your facility needs without getting in the way of the day to day.

Because when it comes to a place that's saving lives, there's just no room for a sub-par HVAC system.

THINK IT'S A CHALLENGE? NOT FOR US

- ▶ **Partner with a WBE union shop experienced in hospital HVAC modifications, equipment maintenance and service**
- ▶ **Work with our sheet metal workers, service technicians, pipe fitters and degreed engineers/project managers**
